

Inform the boss

Draw a flow chart for the following problem:

Fred sells bunches of flowers at the local shopping center and enters each sol bunch of flowers in the system by pressing “S” (Sold) followed by the name of the flowers (e.g. Roses) and the price (e.g. 12.30).

One day Fred's boss, Joe, tells Fred that at any time during the day he (Joe) will need to know:

- how many bunches of flowers have been sold
- what was the value of the most expensive bunch sold
- what was the value of the least expensive bunch sold
- what is the average value of bunches sold

He can print this information by pressing “I” (Information).
