  - Programming (C/C++, Python, Java, HTML/CSS, Bootstrap, Embedded systems, Docker, SQL/NoSQL, Reflex)
- Presentation Skills
- Leadership skills
- Driver's license

Featured Work

TtT pager: space communication system

HackTUES Infinity - 2022 from March to May

- As space travel becomes more affordable, more and more people from all sorts of countries will be heading there. Here lies the problem of the language barrier that our TtT pager project overcomes.

- The TtT pager represents the N number of devices—pagers—that each astronaut carries with themselves and one master server (Big Mama) that is used to process and translate the communication on board without the need for the Internet.

Goals in Fontys

Achieve new successes and obtain new knowledge in Data Science

Make new international friends
